

Says

What have we heard them say?
What can we imagine them saying?

A lot of people travelling in airways nowadays, So Global Air Transportation is a necessary thing

Global Air Transportation Helps to travel distant places

The Pilot Will mentally and physically strong to operate the airplane

I'm wondered about the knowledge of Flying in the sky

Planes, Jets, Rockets, Helicopters and drones are the Global Air Transportation Networks

It is only used by Wealthy people Because it cost is expensive

Monthly Monthly 15.24% of people travelling in Airlines

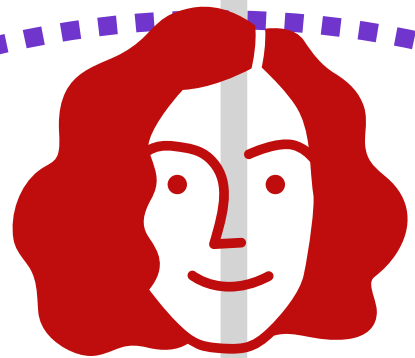

That is a bit harder to sustain in thr Air Transportation Network

They provide security check up in the air line that is very well and good

I think the management for Air Transportation is very huge process and it is crucial

They must have a lot of experience to aviate

Jabeenu
Working in project with my team : Unlocking Insights into The Global Air Transportation Network With Tableau.

Global Air Transportation is very useful to travel long places very easily and quickly

It is very useful to explore new countries and continents

It is a very Fastest way of travelling

It is used to communicate across internationally about Personal, Business, Medical and Tourism Purposes

It is a Fastest transport with less traffic

One of the Fear in travelling in ways is unexpected atmosphere brust

It is too much of cost to Travel in Air transport

It is very comfortable to travel long distance and also For Transporting goods over the world

I feel happy to travel in Airways

Travel is a Joy of Happiness

Does

What behavior have we observed?
What can we imagine them doing?

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
